QMS Transition Program to the New Edition of ISO 9001:2026 Requirements

Preview — showing 3 of 29 activities from the full Program, selected to illustrate requirements newly introduced in this edition.

#	Content of Activities	Process	Cost (if applicable)	Responsible	Deadline	Reporting
3	NEW – 2026 Review the Context of the Organization (cl.4.1). In the ‘Management Review’ process, add an explicit determination of whether climate change is a relevant issue for the organization, and document the conclusion (even if the answer is “not relevant”) as a modification to the Quality Manual.					
9	NEW – 2026 Update Leadership Commitment (cl.5.1.1) to add the new expectations: promoting quality culture and ethical behaviour; promoting the process approach and risk-based thinking; and taking accountability for the effectiveness of the QMS.					
11	NEW – 2026 Enhance the ‘Working Environment’ procedure (cl.7.1.4) to explicitly address social (e.g. non-discriminatory, calm, non-confrontational), psychological (e.g. stress-reducing, burnout prevention, emotionally protective) and physical factors — particularly for roles or services where psychological well-being materially affects quality.					

Note: The ‘Content of Activities’ column contains references to the clauses of the new edition of ISO 9001. Clause numbers correspond to the harmonized structure carried over from ISO 9001:2015 and are provided for guidance; confirm against the final published text once available.

[End of preview. Activities 1–2, 4–8, 10, 12–29 — covering leadership, working environment, resourcing, organizational knowledge, customer communication, design and development, external providers, production and service provision, audit, management review, corrective action, and the certification transition steps — are included in the full purchased Program. Visit the product page to purchase the complete QMS Transition Program.]
